June 38th Plover

My dear Enslin -

Yours of 3^d to Watson &

was just in.

Thanks -

Lemann's other

two new beings he was going
to describe are old enough -

i.e. *Idelia frontalis* & a form of
Ranunculus affinis.

Pringle has just been
here - staid & level-headed, he
is. You should know the fact
which is this.

Pringle left his much Calif.
collection at the Calif. Academy
while he went to Japan.

He told ~~the~~ ~~that~~ Parry and Greene
that they - as correspondents with
whom he exchanged - might
look them over and take
a specimen of any they wanted
when to spare. Gave no
leave for any thing else: was
surprised as much as I.

Greene - in his explanation

MISSOURI
BOTANICAL
GARDEN

to me represented it otherwise -
in a rather indirect way. I
have given Dring's account of
it to Greene - and therefore
you should know it too.

I have written plainly, but as
kindly as I could to Greene,
and from what good
Parry writes, of the ink
he feels his position,
and man amend,

Beware of you

Pyrus ottusa. It would
be just the name for
P. sambucifolia, which is from
V. W. Snow.

The characters are well
given, of the two species in
my hand *P. 161*, - and they
are all. Another species will
make a fifth wheel to the
coach!

Are all your friends

Engelmann

Cambridge, Jan 13, 1882

My dear Engelmann

Your letter is here,
and the parcel of Cupress.
Cupressus turned over to Nat-
Mr. Schidager & all but
Aster named or nearly, I
am now revising Schidager, which
is not so utterly perished as
as Aster is.

I shall put a good number
of the unnumbered specimens
into your pigeon-hole, ready
for you when you get round
here to spend April & May.

We can make you very com-
fortable here in - doors in our
warm spring weather, and May
you can ramble in the ro-
the garden. You will make

your home here, where we
can make you very com-
fortable.

My sister al-
ways goes back into the country
about that time of year;
and even otherwise there is a
room for you. - We can talk

0 1 2 3 4 5 6 7 8 9 10

cm

copyright reserved

MISSOURI
BOTANICAL
GARDEN

about now best to utilize
our short remainder of
time for Botany.

I have a good many
new things of P. W.,
of Loomis, Pringle, etc—
and Watson perhaps
as many more.

I have a notion to
get up, at once, a paper
— Swiss Austro-Alpine
— Diagnosis &
some revisions. My things
are chiefly Swiss

I will ask Watson to
contribute his, and now
I ask you to send yours,
for me to print for you.
Brief Diagnosis will be
best. — but as much as you
like. That will save

0 1 2 3 4 5 6 7 8 9 10

Scattering the material
about. The paper to be
in ~~A~~ Proc. Am. Acad.
My style, you know, is
Latin. Proc. Amer. Char-
acters; and you, like me,
I presume, find it at the
earliest to draw up.

If you see 'em, put
together your characters as
soon as you can.

I am wearing M
the Luntago, and go to
Washington for Smithsonian
Meeting, on Monday

Mrs. Gray joins heartily
in hopes you will come,
and says - of course Dr.
Engelmann is to come to
us, - always soon and a
welcome. How nice to

Love you.

Very truly,

A. Gray

Rec Febr 3^d
Ans " "

Cambridge, Mass Jan, 30, '82

My Dear Engelmann.

Yours of 11 inst is your best.

I have given to Pringle your
name Eriophora nudicaulis. I

cannot fairly say it. It is a rather
thin & serves to name.

Will you send me a diagnostic
character of it - and of Linnæa
gentiana microphylla - to put
into the Contribution. I

now have - on my part -

ready. How soon will you
send me characters of Eri-
phoria, etc. —

Considering how well we
are here up in Eriophora,
I should have thought - you
would have given us a sight
of your new Eriophora before
before publishing it.

The time is near when
Watson & I must
strike & cut off all
examination of plants
other than of the family
or genus we are at the
time working. Otherwise
we shall never get on at
all.

We had a pleasant
short visit to Washington -
a Sunday in Philadelphia
with the Redfords,
& a day in New York
Ever Yours cordially

My Dear Engelman

And now comes Eichler's
Bildungsabwickelungen bei Fichta-
zopfen. You must give an
analysis of the two articles
together.

I am now ready to ~~print~~
print Kritik ~~präsentation~~
ironica, etc.

Pray give me characters
of any you have made out
of Linnæus & Pringle's & other
other things. Give me
char. & notes of the Erythraea;
of Pringle, the 'Benthamia microphylla'
of Linnæus, etc. —

Please send soon.

The death of Mr. James
was very sudden. — No body now
for money but Lesquereux, & for nearly
effete. Ever truly Arthur

Dear Sir,

I have at your request
indicated about letters,
I shall be glad to write
supplied in that of recent
once.

The loco plant I pre-
sume is Stragelus bisulcatus

I have a small trunk
by his printer, who expects
orders. I asked him to send
50 copies to the printer to you
direct. When I do, I will
then come to you. I wrote
at once to Dr. A. to ask if
the lot ordered had been
sent to you. The reply
was that it had been sent
to you. I then sent the
lot sent to you, including
2 copies.

I have not seen Catechisms
paper on Catechisms -
Probably could not read it.
It is for you to draw up
any abstract & criticism
it. Made to good to me
the old view re. Catechisms
I think much of Catechisms.

I have at length sent
you my English & English
quite adequate to me to
a lot of my stuff.

I had at my first year
now for your English &
that a good chance in the
subject.

I am begging over
the Compositae - now
the Verbenaceae & the

your Rudbeckia & his man =
usual report to the
R. pulchra, I return R.

My Dear Euphemia

HERBARIUM OF HARVARD UNIVERSITY,

BOTANIC GARDEN, CAMBRIDGE, MASS.

Sept. 27

1882

We got home Monday Eve -

the day you called, so sorry
to miss you. Both Mrs. Gray &
I.

Sargent - getting back, has
never been over here, for an hour.

I have communicated with you
but hardly written to you. Of
course my hands are kept
full, & a head of steam always
on.

Winter is very cold at
St. Louis - Better come &
pass 1/2 of it here - where you
are very welcome.

You lost little by not
going to Saginaw. - except
some pleasure in travelling.

I hope you got the Expos for
St. Louis. I sent you.

with me.

The deep colour, I have
only tasted - I do not like
it for well - but may
later - shall try it again
after a while.

Ever yours truly

Anthony

My dear wife - I have just
received your letter of the 10th
and am very glad to hear
from you. I am well and hope
this finds you the same. I
am very much interested in
the light - colouring
of the fruit, and the
it grows in me, I think
it is a beautiful - colouring -

Dear Engelman

Best wishes
to you, and felicitations
on your Semi-Centennial
as an American! Per-
haps we may celebrate the
 $\frac{3}{4}$ -Centennial.

About the Styracaceae,
I thought I had corrected
my slip in writing to
you. Your Indian Tree,

is H. corymbosa, Torr. & Gray.
- which I keep up - a good sp.
next to H. DCatissus.

The Lithuanian, Torr. var. is -
from the head - H. artemesia-
folia, which varies greatly in
foliage, but character good. -
